Q3 2011 Review: WNAI

Index Description. The WNA Nuclear Energy IndexSM (TICKER: WNAI) decreased -21.11% from 2798.08 to 2207.43 in the third quarter of 2011. This compares to a decrease in the MSCI World Index (TICKER: MXWO) of -17.60% and a decrease in the S&P 500 (TICKER: SPX) of -14.33%.

The best performing stocks were Shikoku Electric Power Co (TICKER: 9507 JP), which rose +22.34%; Yokogawa Electric Corporation (TICKER: 6841 JP), which rose +13.15%; and Progress Energy Inc (TICKER: PGN US), which rose +7.73%. The worst performing stocks were Paladin Energy Ltd (TICKER: PDN AU), which declined -56.22%; USEC Inc (TICKER: USU US), which declined -51.80%; and McDermott International Inc (TICKER: MDR US), which declined -45.68%.

The WNA Nuclear Energy IndexSM (WNAI) is down -27.65% year-to-date and down -17.88% in the past 12 months.

Index Description. The WNA Nuclear Energy IndexSM (WNAI) is a composite equity index designed to serve as a benchmark for globally traded stocks that are materially engaged in the nuclear energy industry. WNAI comprises public companies engaged in five primary nuclear energy sectors: a) Reactors; b) Construction; c) Fuels; d) Technologies and Services; and e) Nuclear Power Generation. WNAI is a globally inclusive index, which strives to capture all publicly traded companies that meet the index eligibility criteria.

Inclusion Criteria. All companies contained in the WNAI are categorized as being "materially" engaged in the nuclear energy industry. For the purposes of the WNAI, a materially engaged company's performance must be subject to the influence of its participation in the nuclear energy industry. Companies contained in certain sectors of the index must also be principally engaged, and therefore must generate more than 50% of their total revenues from activities directly related to nuclear energy. WNAI contains stocks selected from a universe of equity securities traded on recognized stock exchanges in a) the Americas, b) Europe, Middle East & Africa (EMEA) and c) Asia/Pacific, based on a set of objective screening criteria. The inclusion criteria include requirements for industry participation, primary exchange listing, minimum capitalization, minimum free float, minimum price and minimum average daily trading volume.

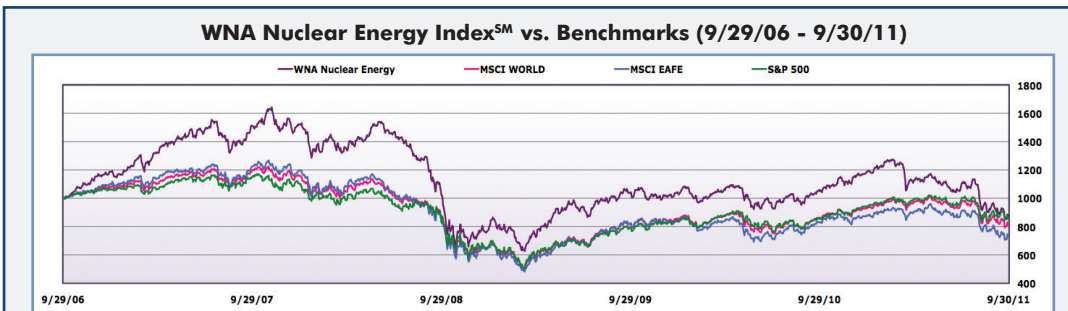

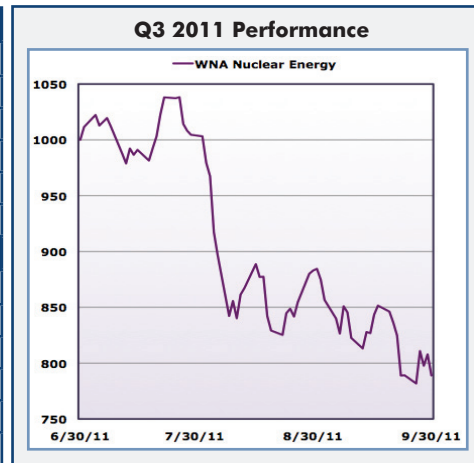

Weighting Methodology. WNAI employs different weighting methodologies for the different sectors: 1) Reactor companies, which account for 15% of the index, are equal-weighted; 2) Construction companies, which account for 15% of the index, are equal weighted; 3) Fuels companies, which account for 20% of the index, are capitalization-weighted, adjusted for float and capped at 3%; 4) Technologies and Services companies, which account for 25% of the index, are capitalization-weighted, adjusted for float and capped at 3%; and 5) Power Generation companies, which account for 25% of the index, are capitalization-weighted, adjusted for free float, further adjusted by the percentage of their total power output generated through nuclear energy and capped at 3%. A diversified company may be weighted for its role in two sectors.

Rebalancing. WNAI is rebalanced quarterly on the third Friday of the last month of each calendar quarter, based upon closing prices as of the prior Wednesday. Index sector weights are fixed at their original weights at each rebalancing.

Index Data. WNAI contains 65 constituents and is calculated in real time by S&P Custom Indexes. Index values are distributed throughout the day at fifteen-second intervals via the Consolidated Tape Association in both USD and EUR. WNAI is calculated on both a price only and total return basis. Daily values from January 1, 2002 are available on the WNA Nuclear Energy IndexSM website and from various data vendors.

Leading Movers				
Company Name	Ticker	Opening	Closing	Change
SHIKOKU ELECTRIC POWER CO	9507 JP	22.654	27.716	22.34%
